

Bullit 600

outboard

The Alumax Bullit 600 outboard is an undisputed lightweight. The aluminum tender has remarkably shallow draft and has excellent sailing characteristics and unprecedented stability. The Bullit 600 can be left in the water in winter and freeze if necessary.

Every Bullit that leaves the Alumax yard, is hand-welded. Even the installation of technology and finishing are purely manual. Production is flexible, allowing us to provide customization.

Standard design

Completely yard built on own soil, v-bottom with spray rail, self draining checker plate floor, double bottom with air chamber, foredeck, u-bench in front of the boat with storage space, steering console with seat at the front, rear bench with storage, railing and bollards integrated, swim platforms, trailer eye on the bow and anode on the underwatership.

All hatches will be fitted with latches, hinges and discharges chutes. The boat is welded from seawaterresistant aluminum and delivered with owner's manual.

Specificaties

Length (o.a.)

6,00 meters

Width (o.a.)

2,15 meters

Draught

0,40 meters

Empty hull weight

600 kilograms

Engine

Up to 140pk

Vertical clearance

1,12 meters
